## APPLICATION OF ACF-50

Sirs

PILATUS has introduced the use of ACF-50 as corrosion preventative for its fleet. We are happy with the product so far. ACF-50 is easy to apply, and very universal. We hope to prevent from corrosion especially in sections where thicker materials cannot penetrate.

We are using the ACF-50 in the engine compartment as well. This means that the exterior of the engines (PT6A-25C) will also be coated with ACF-50.

Best regards

Pius Portmann
